# STUDY ABROAD SUMMER

SPANISH AND ELITE ROWING

SEVILLE - SPAIN

- SAIIE -

"Your Life Experience; Your Education"

# Welcome to SAIIE

Located in the heart of the bustling city centre of Seville, Spain, the Spanish American Institute of International Education (SAIIE) is a study abroad institution affiliated to the University of Wisconsin-Platteville since 1984

Our programs are based around three main goals: academic excellence, cultural immersion and social integration. With the development of our new athletic programs, we are now also able to help students achieve these goals through a sports environment where they can develop their athletic abilities whilst being surrounded by the Spanish culture and people.

# About the Program

Our Rowing program offers US college students, who are rowing back home (male and female), the opportunity to study abroad and row in Seville, Spain through the summer. The students have the chance to immerse themselves in the Spanish culture, take courses at SAIIE, whilst continuing to row on a Spanish team.

SAIIE has reached a partnership with the rowing club, Club Nautico Sevilla, founded in 1952 in Seville to offer this program. The club currently participates in tournaments regionally, nationally and internationally.

## What our students say...

I would definitely recommend this program to anyone who wants to keep training but also wants to get an abroad experience. The Head Coach is very open and will allow you time to travel but if you come to train he will throw in you in a boat, it's a lot of fun, you meet a lot of new people, get to practice the language. Overall, it was a great experience!

"I am so grateful for the opportunity provided by the SAIIE Summer Rowing Program. I was warmly welcomed and integrated into both their practice and competitive race schedule on the beautiful Guadalquivir River/Canal de Alfonso XIII. The ability to complete my international requirements to graduate with International Honors from the University of Alabama while remaining consistent with my on water and weight training regimen through the SAIIE Rowing Program was both academically rewarding and athletically advantageous."
